

The Archive of History and Art-The War Archive

Invites you to a presentation on Saturday 25 September 2021
At 19.00 via Zoom

It is just a movie.....the presentation of war, guns and historical events in the commercial cinema and TV

By Dimitris Papadopoulos

The presentation approaches the reality of the «blood and guts « presentation of war and related history in films and TV. The reality is, of course, very different, but then the question arises if the filmatic presentation is meant to be a «documentary» of the events or just its interpretation.

Dimitris Papadopoulos is more than better qualified to guide us through this fascinating topic. His studies cover the preservation of archaeological material and his professional career spans the most diverse topics related to war but always focused on reality, on his extensive collection of items relating to Greece's (and not only) wars as well as professional services and advice to the film industry in terms of uniforms and equipment.

The presentation will be in Greek.
